

CLAYTON LEWIS

FULL STACK DEVELOPER

A motivated and ambitious full stack developer who strives to attain rewarding, exciting, and impactful positions in the tech industry. I'm dedicated to working with others in creating real world solutions all while seeking an opportunity to apply my skills, grow as a developer, and learn new technologies.

EXPERIENCE

SEP 2023-CURRENT

.NET WINDOWS FORMS APPLICATION

This application was developed in the C# language. Using the .Net framework, I developed an enterprise Inventory windows application. With this project I have learned the fundamentals of UI design in windows desktop applications.

AUG 2023-SEP 2023

EMPLOYEE MANAGEMENT APP

Developed a student management system using Spring Boot and React JS Frameworks and MySQL for database services. This project gives users the ability to update, add, delete, and save employees within the employee list.

MAR 2023-MAY 2023

FULL STACK ECOMMERCE APP

Participated in developing an online ecommerce book store within a small team utilizing best software practices and tools including Spring Security framework for authentication and access control, MySQL & MongoDB for database CRUD services and queries using Spring JDBC, as well as implementing Spring MVC. In the project, I learned the skills and tools of Full Stack Development. Working within a small team, utilizing github for team communication and code reviews, and meeting deadlines for project deployment.

FEB 2022-MAY 2022

FRONT END WEB APP

Aided in creating a full stack Web Application for a small Business Akashic LLC. An interactive webpage where customers can book for events, taste tests, and order food from their account. Using Rest API's, HTML/CSS for front end development and JavaScript for back-end functionality within the Visual Studio integrated development environment.

JAN 2021-MAR 2021

UNIVERSITY WEBSITE

Developed a beginner friendly webpage using front end technologies HTML/CSS. Also included Bootstrap, a front end framework for creation of the website and JavaScript as the back-end and jQuery as the framework. In this project, I learned the different functionalities Javascript implements within a webpage. Users have the ability to search for classes, learn about their professors, and keep up to date with school events.

SCHOOL

2021-2024

BACHELOR OF SCIENCE
SOFTWARE DEVELOPMENT
Grand Canyon University

GPA: 3.26

RELATED COURSEWORK:

Programming in C#, Introduction to Web Development, Programming in C# II, Cloud Computing, OOP, Data Structures, Algorithms, Database Design & Development, MySQL, MongoDB

NOV 2023-Current

FOUNDATIONAL C#
Microsoft Certification

SKILLS

COMPUTING FUNDAMENTALS:

Writing Computer Software
Analyzing code
Debugging/Testing Software
Visual Studio
Visual Studio Code
Eclipse IDE

PROGRAMMING LANGUAGES:

Java
JavaScript
C#
HTML/CSS
PHP

COMMUNICATION + INTERACTIONS:

Thrives in fast paced environments
Effective communicator
Positive attitude
Contributing team player
Open to new ideas
Ability to multitask

FRAMEWORK + TOOLS:

React JS
Spring Boot
.NET
jQuery
Bootstrap
MongoDB
MySQL
Github
